

The CRI Assessment WorkBench

Human-Led. AI-Assisted. Audit-Defensible.

Transform **AI** from an **automated assessment engine** into a **governed assessment partner**

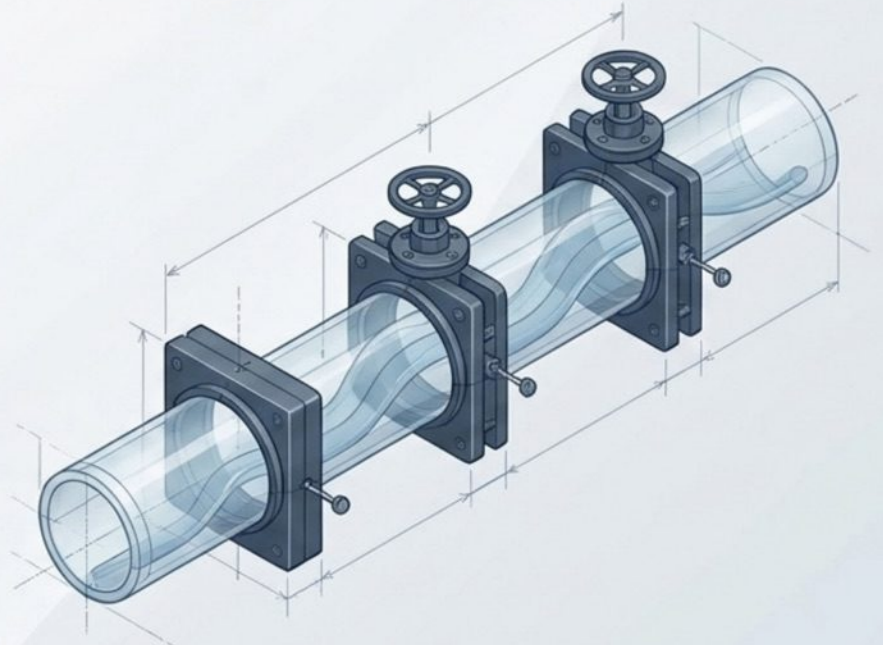

Traditional AI Assessment

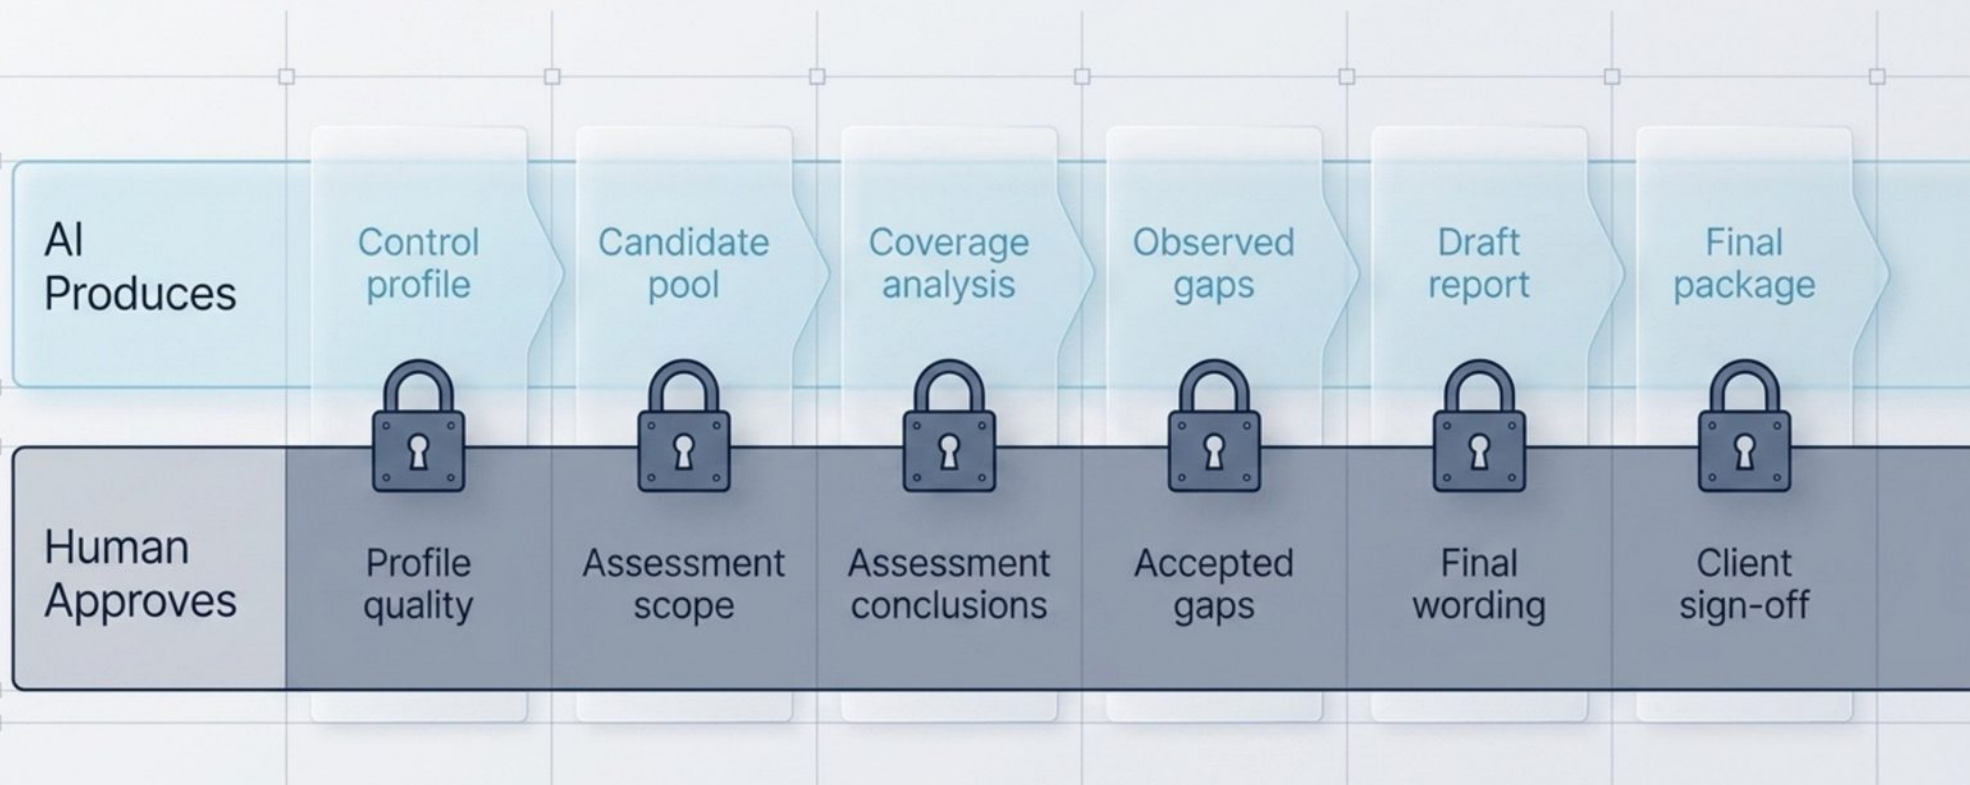

- Black-box decisions
- Difficult to explain
- No formal review points
- Limited audit defensibility

CRI Assessment WorkBench

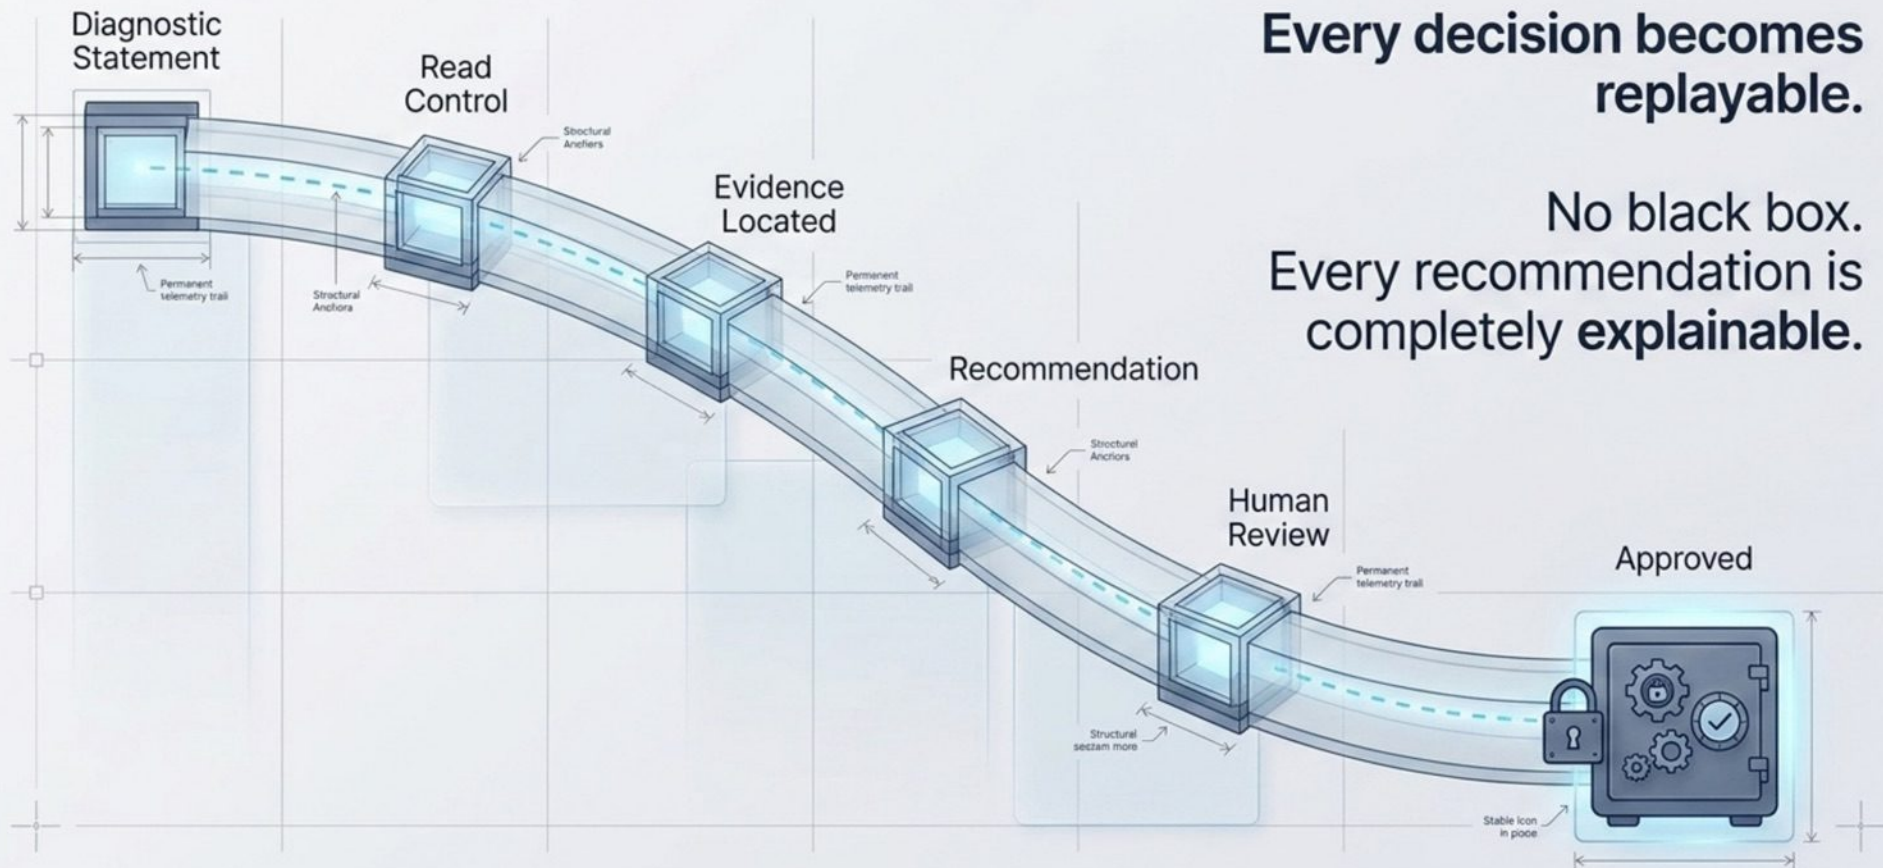

- Human-led transparency
- Explainable logic
- Governed review points
- Fully audit-defensible

AI recommends. Humans decide.

Process Activation Curve: Explainable AI

Technology Architecture

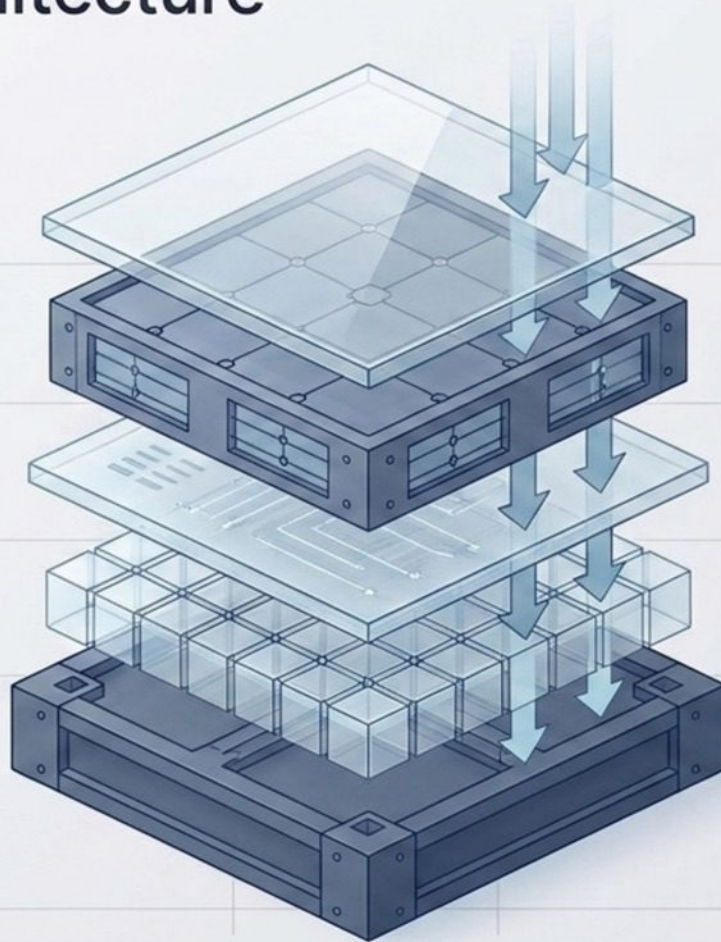

Tableau
Delivers executive reporting

CRI Database
Stores the governed review and approvals

Phoenix
Replays the decision

OpenTelemetry
Records every decision

Python
The core execution engine

Strategic Vision

**The goal is not to
automate the assessor.**

**The goal is to make every assessor
dramatically more effective.**
